

Charles Pavarini III - Kip's Bay Showhouse

■ Kip's Bay Showhouse

MODULIGHTOR is always pleased to assist designers with their special projects. We have worked with many designers for various show houses through the years. We were thrilled when the amazing Charles Pavarini III asked to use a couple of our Pipette table lights **TB91** in the 2012 Kip's Bay Showhouse.

Atypically, this year the showhouse features two side-by-side duplex penthouse apartments in a new skyscraper - each with its own private pool! Wow. But *quite* expectedly, Mr. Pavarini's work is flawless; please check it out! He also worked on the project with another one of our favorite people, Lana Lenar of **Zerolux**. It's a very cool project.

Thank you for including us in your work!
