■ Designer Visions - Drake Design

The seventh annual Designer Visions showhouse opened this week; featuring three apartments each designed by an individual design team and produced by a different design magazine.

Drake Design Associates crafted an apartment for House Beautiful. Inspired by a fictional descendant of the legendary Josephine Baker, Jamie Drake's fierce pad uses MODULIGHTOR spot lights in the living room. And I am so thrilled to have been given the chance to design the two custom Quadron-like chandeliers ([CH07](#)) for the master bedroom. What an honor!

All three apartments are amazing and the opening party was a true design *event*, sponsored by the Hearst Design Group. Go and visit the fantastically renovated 1929 Art Deco jewel of a building - the Walker Tower on West 18th Street.
